Work Experience

EMPLOYER	trivago N.V.
POSITION	Mobile Engineer III
DATES	July 2022 - Present
LOCATION	Düsseldorf, Germany (Hybrid)
RESPONSIBILITIES	<p>Contribute to the development of the trivago hotel search Android application in a cross-functional, end-to-end software development team (from user research to QA, and data analysis).</p> <p>Participate in code reviews, ensuring adherence to team standards and suggesting alternative approaches to solutions when required.</p> <p>Take charge and facilitate tech improvement projects, including strategisation, execution, and reporting.</p> <p>Provide technical support/guidance in development discoveries as squad tech lead.</p> <p>Mentor junior/new peers supporting their technical knowledge and product familiarity growth.</p>
ACHIEVEMENTS	<p>Led and managed the introduction of the Jetpack Compose UI framework to the trivago Android app, resulting in improved developer experience, faster development iterations and improved app quality</p> <p>Assumed responsibility for the development of key member-centric features, including the hotel price drop feature (registration, notifications and list management), and the favourites lists feature, increasing member acquisition and engagement</p>

EMPLOYER	Headspace Care (formerly Ginger)
POSITION	Senior Mobile Engineer
DATES	April 2021 - August 2022
LOCATION	United States (Remote from Lagos, Nigeria)
RESPONSIBILITIES	<p>Worked in the mobile engineering team to develop the Ginger Care mobile app, including features as user registration, authentication, content and user data management.</p> <p>Created and reviewed technical design documentation detailing problem-solving approaches to new changes, including specifying pros and cons and readapting based on feedback.</p> <p>Participated in frequent end-to-end, manual QA on the Android and iOS apps, preventing regression and ensuring the expected behaviour of new features.</p> <p>Managed Play Store and App Store releases of the Ginger Care app, including organisation, definition of changes and coordinating testing protocols.</p>
ACHIEVEMENTS	<p>Ported the Ginger Flutter Mobile app to a Flutter Web app, leading to quicker development iterations and an increased user base.</p> <p>Redeveloped the content system of the Ginger Care app in a three-person engineering sub-team, resulting in higher quality and a better user experience.</p>

EMPLOYER	Autochek Africa
POSITION	Android Engineer
DATES	September 2020 - May 2021
LOCATION	Lagos, Nigeria
RESPONSIBILITIES	<p>Worked in a startup team to develop and release the Autochek car marketplace Android app, including features such as Ad placements/uploads, financing application process, purchase payments, user authentication, etc.</p> <p>Led the development of the Autocheck partner's inventory management app.</p>

ACHIEVEMENTS Release the first version of the app supporting up to 15,000 downloads.

Redeveloped the content system of the Ginger Care app in a three-person engineering sub-team, resulting in higher quality and a better user experience.
